MOTIVATION

Interested in various areas of machine learning, data analysis, modeling. Fast learner. Confident with Python (*Scikit-learn*, *pandas*, *NumPy*, *Matplotlib*, *SimPy*, etc.), also have a good mathematical background. I have work experience with Java, SQL, C++, Git, libraries for machine learning and neural networks.

WORK EXPERIENCE

Engineer │ **ITMO University National Center for Cognitive Research** │ 10.2019 – 06.2021

- Main projects:
    - Development of a predictive model of therapy for patients with arterial hypertension
    - Building a map of points of interest in St. Petersburg based on Instagram posts
    - Preparation of a library for business process models construction
    - Simulation modeling and analysis of business processes
- My tasks (and technologies): web scraping (*Beautiful Soup*), data preprocessing and analysis (*pandas*, *NumPy*, *Matplotlib*), predictive modeling (*Scikit-learn*, *xgboost*), text processing, topic modeling (*NLTK*, *BigARTM*), testing (*unittest*), design of algorithms (*Python 3*), simulation modeling (*SimPy*), sensitivity analysis (*SALib*)
- Defense of research at conferences: pHealth (November 2021), X Congress of Young Scientists (April 2021), MICSECS-2020 (December 2020), and others
- As a result of the conferences, 2 articles are awaiting publication in indexed journals. I have a publication in the Procedia Computer Science, in ITMO University collection of works of young scientists, in proceedings of conferences

Intern │ **ITMO University Digital Healthcare Lab** │ 08.2019 – 10.2019

- Acquaintance with the department, the beginning of work on projects

Technician │ **ITMO University Faculty of Control Systems and Robotics** │ 12.2018 – 06.2019

- Conducting a seminar on mathematical foundations of robotics under a faculty grant
- Defense of a research

| **Intern** | Implementation department of OpenWay Service | 07.2018 – 08.2018 |

- Summer school internship. Creating a QR-code payment service based on the company's products
- My main tasks: Implementation of a mobile application (*Ionic Framework*), part of the server component (*Java*), Rest API for interaction with the system

EDUCATION

| **Master's degree** | ITMO University, Faculty of Digital Transformation, Mathematical modeling in medicine and healthcare | 2019 – 2021 |

- Diploma with honors
- Studied machine learning algorithms, neural networks (*Keras*, *TensorFlow*), discrete and continuous models (*SciPy*, *SimPy*), methods and models for multivariate data analysis, time series (*ARIMA*), evolutionally algorithms (*deap*), parallel algorithms of data analysis (*OpenMP*, *CUDA*), as well as applications in medical and healthcare tasks
- Training team projects:
  - Analysis of topic dynamics in tweets about coronavirus in March–April 2020, search for hidden states of discussion (*BigARTM*, *ARIMA*, *Scikit-learn*)
  - Development of health information system, divided among students into a set of services (*Django*, *PostgreSQL*)

| **Bachelor's degree** | ITMO University, Faculty of Control Systems and Robotics, Mathematical modeling | 2015 – 2019 |

- Diploma with honors
- Studied advanced mathematics (advanced courses in algebra, geometry, statistics, etc.), algorithms and data structures, OOP (*Java*), databases (*SQL*), optimization methods, computing software (*Mathcad*, *MATLAB*, *Mathematica*)
- Participated in quantum optics seminars in 2017–2018. Worked on the problem of modeling an optical signal in a turbulent atmosphere

ABOUT ME

- English – Advanced (C1)
- Have experience in public speaking and presentation, teaching of programming languages
- 2019–2021 V. Potanin Foundation Fellow
- Received a scholarship for priority areas in 2020
